

Askoll
I am electric

Teens VS Parents

SAY YES TO THE ELECTRIC MYTH.

Wow!
We've got the moped
before the moped.

It's super cool
and really easy
to handle.

Wow!
The stickers
make it unique.

ebolt rocks!
It goes everywhere.

At least you'll stop
asking us when
you're getting a moped.

We're not worried
because it only
reaches 25 km/h.

It's environment-
friendly and
Made in Italy.

Perfect! You can have
fun and maintenance will
cost us only a few euros.

ebolt
Askoll

You can
ebolt it
even more.

APPLY THE STICKERS
AND MAKE IT UNIQUE.

Socialise, you are an ebolter.

ebolt
Askoll

Won't it go too fast for my son? And what if the charge doesn't last long enough?

No problem: ebolt has a top speed of 25 km/h and an autonomy of as much as 80 km. Then, it recharges in a flash: to give you an idea, ebolt charges from 0% to 100% in five hours, connected to any power socket.

Cool! What about the technology?

ebolt has an on-board computer that constantly shows you the status of the battery charge, the speed, the level of assistance (there are 4) and the remaining running time. PS: Just remember that the autonomy varies depending on the level of assistance selected.

TECHNICAL SHEET

Your ebolt has no limits.

Cycle parts

Motor	Askoll Brushless rear motor, black in colour
Power	250 W rated power
Top speed	25 Km/h
Max Torque	40 Nm
Assistance levels	4 + walk assistance + soft start
Gears	Single-speed model

Removable battery

Type	Lithium ions - Panasonic cells
Capacity	300 Wh
Voltage - Amperes	36 V - 9 Ah
Weight - Charged	2,6 kg
Charging time	5 hours x 100%
Autonomy	Up to 80 km

Construction

Dimensions	147 x 107 x 70 cm (LxHxD)
Type of frame	Rigid

Saddle	Standard with black saddle pin
Wheels	20" with black rims
Brakes	V-brake front/rear
Lighting	LED front/rear
Mudguards	Glossy black (optional)
Parcel rack	Rear rack (optional)

Hey friends, have you seen how cool the ebolt is?

Listen to this: ebolt is the first bike with motor-assisted pedalling designed for us. If you are also one of "our" group (if you are between 10 and 13 years old), you can enjoy this electric bike too. No movement will ever be like it was before.

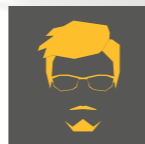

HEY BROTHERS, WE ARE EBOLTERS!

How much fun can we have with ebolt?

A lot. The new ebolt allows you to take long trips, on holiday or in town. Enjoy it every day: it is perfect for getting to school quickly and easily. With it you can move safely and easily even in city traffic. On trips you have great fun and you can take it on your incredible holidays, making them even more electric!

Why ever should I buy you an electric bike?

We can tell you why we designed and made this bike. We wanted a new, extraordinary product that would make "sustainable mobility" a concept for the whole family.
