

PRESS RELEASE
ASKOLL EVA: COOLTRA ORDER FOR SCOOTER, BATTERIES AND CHARGERS
WORTH AROUND 1.3 MILLION EUROS

Dueville (VI), 20th January 2023 – Askoll EVA S.p.A., a leading company in the sustainable mobility market which develops, manufactures and markets e-bikes and e-scooters, as well as kits and components in the area of electric motors and batteries, announces that it has received a **new order**, for a total value of approximately **€1.3 million**, from **Cooltra**, Europe's leading two-wheeled sustainable mobility company with a fleet of more than 20,000 vehicles. The agreement provides **400 eS2 Sharing electric scooters, 80 extra batteries** and **60 chargers** within the first semester of 2023.

The Askoll eS2 Sharing model has a **power of 2,200 W** and a **maximum speed of 45 km/h**. It is equipped with **two lithium-ion batteries**, which together have a **capacity of 2,800 Wh**, with a **maximum range of around 80 km**. The **removable battery system** of the Askoll EVA vehicles combines perfectly with the free-floating business model of Cooltra: the scooters are recharged by replacing the batteries in use with newly charged batteries so that "filling up with energy" takes just a few moments, guaranteeing the maximum efficiency of service of the entire road fleet.

The Askoll eS2 Sharing 2.8 scooter is equipped with an electronic geolocation system and communication with the operations centre, which allows vehicle activation via a smartphone APP, unlocking the kickstand and opening the top box supplied with the vehicle where two helmets are housed for the driver and any passenger.

Gian Franco Nanni, CEO of Askoll EVA, stated: *"The new year started under the best auspices, given the new order from Cooltra. The new scooters will be used to strengthen their sharing fleet in Europe, ready to capture the renewed interest from consumers in sustainable mobility. However, we do not want to stop here, so we are working to close new distribution agreements in some strategic European markets and thus continue to lay the foundations for future growth. We are also looking for new commercial outlets in the sector of electrification kits - motor and battery - for electric mountain bikes. In this rapidly developing market, we at Askoll EVA are ready to seize all the opportunities that arise"*.
